Cel szkolenia:

In this course, you will learn how to implement and centrally manage an enterprise security infrastructure composed of multiple FortiGate devices.

Enterprise Firewall Administrator course doesn't include parts related to the troubleshooting process and tools. These topics are covered in a separate training: Network Security Support Engineer.

Objectives

After completing this course, you will be able to:

- Centralize the management and monitoring of network security events
- Implement a high availability (HA) solution on FortiGate
- Combine OSPF and BGP to route enterprise traffic
- Harden enterprise services
- Simultaneously deploy IPsec tunnels to multiple sites using the FortiManager IPsec templates
- Configure ADVPN to enable on-demand VPN tunnels between sites
- Integrate FortiManager, FortiAnalyzer, and multiple devices using the Fortinet Security Fabric
- Optimize FortiGate resources

Who Should Attend

Networking and security professionals involved in the design and administration of an enterprise security infrastructure using FortiGate devices should attend this course.
