Szkolenie: SCADEMY

CL-ONA OWASP Top 10, C# Secure Coding Follow Up

Cel szkolenia:

This course is the next step for our participants, who completed our OWASP Top 10, C# Secure Coding Fundamentals course. This is a follow up training, meaning that in order to attend this, everyone must already have the knowledge that is covered in the Fundamentals.

This course enables our participants to gain a deeper knowledge in the field, because here we emphasize the C#-specific aspects of secure coding instead of the general vulnerabilities.

At the end of the training everyone has the possibility to take an exam, where they are able to measure their level of the gained knowledge.

Participants attending this course will:

- Learn client-side vulnerabilities and secure coding practices
- Learn to use various security features of the .NET development environment
- Have a practical understanding of cryptography

Audience:

- Web developers

Plan szkolenia:

- Client-side security
  - JavaScript security
  - Same Origin Policy
  - Simple requests
  - Preflight requests
  - Clickjacking
    - Clickjacking
    - Exercise – IFrame, Where is My Car?

Note: Training come with a number of easy-to-understand exercises providing live hacking fun. By accomplishing these exercises with the lead of the trainer, participants can analyze vulnerable code snippets and commit attacks against them in order to fully understand the root causes of certain security problems. All exercises are prepared in a plug-and-play manner by using a pre-set desktop virtual machine, which provides a uniform development environment.
