Training: CompTIA
CompTIA AI Customer Support Essentials

TRAINING GOALS:

Artificial intelligence is transforming customer support, moving beyond basic automation to draft personalized responses, diagnose complex issues, and turn scattered ticket data into actionable insights in real time. Support professionals who understand how to guide these tools can resolve cases faster, communicate with greater empathy and consistency, and build reusable resources that strengthen the entire team. Mastering AI-assisted workflows lets you shift repetitive drafting and documentation to AI and focus your energy on judgment, relationship building, and service improvement. With the right skills, you can boost efficiency, elevate customer satisfaction, and deliver more consistent, high-quality support at scale.

In this course, you will do the following:

- Interact with AI chatbots effectively and efficiently.
- Use AI tools responsibly.
- Draft and refine customer responses with AI.
- Handle difficult customer situations with AI support.
- Summarize and document customer interactions with AI.
- Use AI for troubleshooting and issue resolution.
- Create and improve support content with AI.
- Work effectively alongside AI agents in a customer support environment.
- Analyze customer tickets, feedback and support trends with AI.
- Use AI to support personal development and onboarding.
